PROFESSIONAL SUMMARY

Software Engineer with 5+ years building scalable, production full-stack web, mobile and AI applications. Currently building CRM, workflow automation and AI page-builder modules for Serlzo, a SaaS creator platform. Founder of SendSawa, a social commerce platform serving 100+ Nigerian merchants. Strong in TypeScript, React, Next.js, Node.js, Python and PostgreSQL, with hands-on LLM work using LangChain, RAG and Groq.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, C++, SQL
- **Frontend and Mobile:** React, Next.js, React Native, Redux, Zustand, GSAP, Electron
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, authentication (JWT, NextAuth)
- **AI and Search:** LangChain, Groq, embeddings, RAG
- **Data and DevOps:** PostgreSQL, Supabase, MongoDB, Firebase, Docker, Git, CI/CD, automated testing, Agile Scrum, Vercel

PROFESSIONAL EXPERIENCE

Serlzo | Software Engineer | UK (Remote) 04/2026 to Present

- Engineer on Serlzo v2, an all-in-one SaaS platform for creators, in a 4-person Agile Scrum team; shipped 7 of 8 assigned modules in my first quarter
- Built the CRM and courses modules across the creator dashboard, admin app and public site
- Owned the frontend of the workflow automation module, a trigger-and-action builder connecting features across the platform
- Built the admin dashboard, making routine operations self-serve with no direct database access
- Building the AI page builder: a visual editor and funnel canvas driven by Sio, Serlzo's AI agent
- Built the landing page from scratch and led its performance optimization and technical SEO
- Took the mobile app to a release-ready Android build; built the community discovery and referral interfaces

Oceanz Robotics | Robotics Engineer Intern 03/2024 to 09/2024

- Designed IoT automation for 5+ client projects in embedded C++ on Arduino, improving operational efficiency by 40%
- Built React and Node.js dashboards for real-time system monitoring, cutting development cycles by 25%

Freelance Software Engineer 2021 to 2024

- Delivered React, Next.js, Node.js and TypeScript apps for startups and 3 global brands, including a MERN e-commerce platform and a people matching app with a 12+ endpoint REST API
- Built JWT/NextAuth authentication and Flutterwave payments, reaching 92% onboarding completion and a 99.2% payment success rate
- Set up CI/CD that cut deploy time from 45 to 8 minutes and page load times by 60%; built a Telegram bot that reduced delivery delays by 35%

PROJECTS

SendSawa | Founder | Next.js, Supabase, TypeScript, Vercel

- Social commerce platform giving sellers one storefront link with listings and checkout, serving 100+ merchants in Nigeria
- Built SSR, dynamic sitemaps and subdomain storefronts that rank merchant stores in Google Search and AI Overviews

unlost | Electron, React, TypeScript, Python, FastAPI, LangChain, Groq

- Desktop app that finds files by description, searching text in PDFs, Office files and OCR'd images, fully on-device
- Hybrid retrieval fusing embeddings, SQLite FTS5 and filename matching via reciprocal rank fusion; cited Q&A with LangChain and Groq; 41 automated tests

2048 AI Solver | Python, NumPy, Numba

- Built and benchmarked Expectimax, Monte Carlo and NEAT agents for 2048 over 100 games each; Expectimax reached the 2048 tile in 79% of games, 5x the next-best approach

EDUCATION

B.Sc. Industrial Physics, First Class Honours (CGPA 4.68/5.0), Covenant University, Nigeria 09/2021 to 08/2025

LEADERSHIP

Frontend Co-Lead, Google Developer Student Club, Covenant University 09/2024 to 07/2025

- Led the frontend track for 80+ students, ran 12+ workshops and mentored 25+ students
